Helping to save the earth... one community at a time

Earth Day on the Mountain!

Be a part of the magic of Earth Day by joining us in our celebration on

April 18, 2009
10:00am to 4:00pm
at

Rim of the World High School
27400 Highway 18
Lake Arrowhead, California

Participating organizations and businesses will be able to use this one-day event to reach out to the mountain communities with their messages regarding sustainability.

The celebration will consist of booths and presentations. Presentations will be held in the Performing Arts Center of the high school, a 310 seat theater, where films about recycling, water con-

servation and renewable energy, for example, will be shown throughout the day. Vendors will be given booth space around the campus and invited to display eco-friendly products, energy saving systems, water conservation methods, and other sustainable resources to the public.

Alternative fuel vehicles will be on display, and various other companies will be exhibiting new "green" technologies.

At your booth, you will be able to talk to people, hand out flyers, give away goodies, do demonstrations, present exhibits, sell your products, entertain the masses, network with your fellow green enthusiasts, or whatever else you can think of!

For more information and booth registration, please call:

Jerry Usrey at (909) 816-9456 or email:

Who we are:

Green Team Arrowhead is a group of citizens concerned about the problems that face our world, our country, our state, and our community. As a nation we are using and abusing our resources at a rate that, if continued, will make our planet uninhabitable. We believe that each of us needs to do our part in preserving and protecting our environment.

We are all about SUSTAINABILITY!

We seek green solutions that will have impact upon the environmental problems caused by reliance on fossil fuels. We seek unique approaches aimed at developing and using alternative forms of energy that will be sustainable into the future.

Green Team Arrowhead's ultimate goal is to transform our mountain community into a

sustainable environment other communities will want to emulate. We will accomplish this through education, consultation, and efforts to bring environmental organizations together to reach a common goal.

Please join us in helping to save the earth one community at a time.

Did you know?

- Every hour enough sunlight reaches the earth's surface that could potentially provide the world with power for one year.
- The amount of energy Americans use doubles about every 20 years. Electricity consumption is expected to increase 45 percent by 2030, according to the U.S. Department of Energy's Energy Information Administration (EIA).
